F1 SR

Silence

F1 SR are standard F1 cabinets built to reduce the emitting noise from any equipment inside the rack.

Performance

Adding SRM mat to the sidepanels and rear door as well as adding sealing around front and back door together with three point locking.

The noise level will be lowered substantially.

In testing we have reduced the noise level substantially.

Fan with a typical active equipment noise have the following result:

Open frame: 55 dBA (measured from 1 m distance).

F1 standard: 50 dBA

F1 SR: 42 dBA*

*For reference, "normal" office background noise is around 40 dBA.

For other technical data besides noise please see corresponding technical data on a standard F1.

NSVB SR

Silence

NSVB SR is standard Enoc NSVB cabinet built to reduce the emitting noise from any equipment inside the rack.

Performance

Adding SRM mat to sidepanels, roof, bottom and front door.

The noise level will be lowered substantially.

In testing we have reduced the noise level substantially.

Fan with a typical active equipment noise have the following result:

Open frame: 55 dBA (measured from 1 m distance).

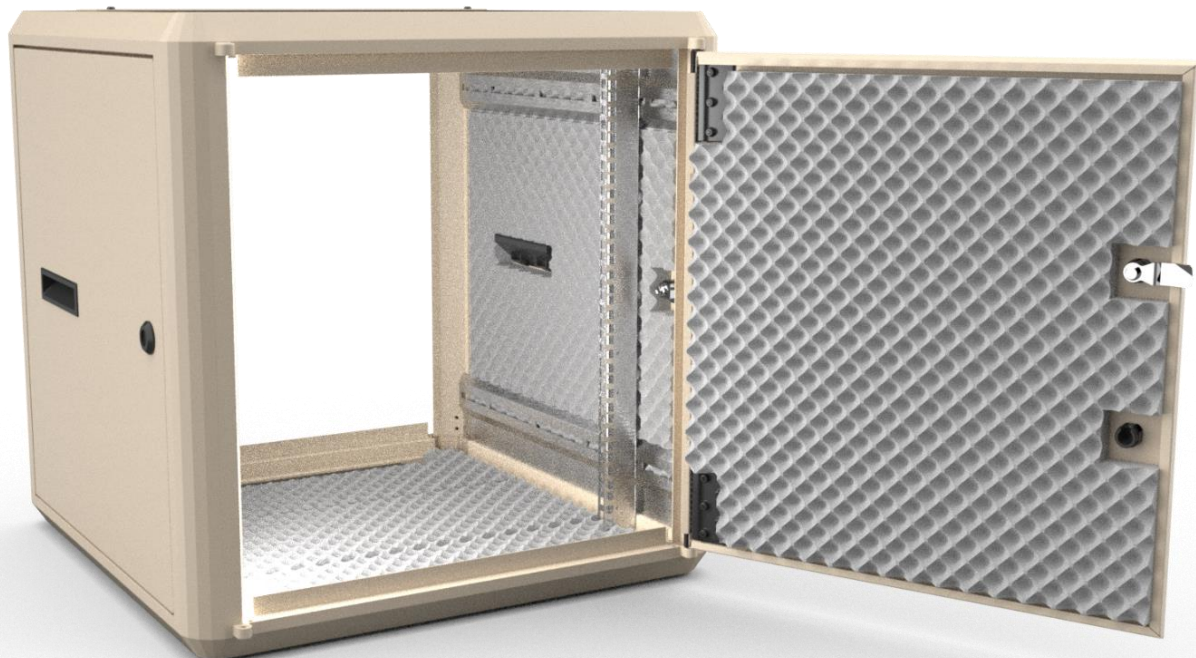

NSVB standard: 50 dBA

NSVB SR: 42 dBA*

*For reference, "normal" office background noise is around 40 dBA.

For other technical data besides noise please see corresponding technical data on a standard NSVB.
